DETAILED ACTION

1. Claims 1-18 are presented for examination.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being obvious over Klein (US 5,835,763).
- 3. As to claim 1, Klein teaches a process for processing a batch job, comprising: wrapping the batch job to create an application programming interface for communication with a batch framework, the batch framework comprising a method to execute the batch job; and invoking the batch framework according to a predetermined schedule (col. 3, lines 31-54).
- 4. Klein fails to explicitly disclose using classes to dispatch the batch jobs, even though Klein does teach a method to execute the batch job (col. 11, lines 7-11 and col. 5, lines 49-54) and also teaches using objects in object-oriented programming (col. 10, lines 10-11). It is well known in the art and obvious that classes can be used in batch processing systems because it is a standard in object oriented programming.

Art Unit: 2127

5. As to claim 2, Klein teaches the process of claim 1 wherein the batch job resides locally with the batch framework (col. 5, line 4).

- 6. As to claim 3, Klein teaches the process of claim 1 wherein the batch job resides remotely from the batch framework (col. 5, lines 12-13).
- 7. As to claims 4-6, Klein teaches the process of claim 1 wherein the batch framework is invoked by a scheduling service (col. 3, lines 39-40).
- 8. Claims 7-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klein (US 5,835,763) in view of Swartz et al. (hereinafter Swartz) (US 6,625,651 B1).
- 9. As to claims 7-8, Klein fails to explicitly teach the process wherein the scheduling service is AutoSys. However, Swartz discloses processing a batch job using Autosys (col. 20, lines 56-62). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the use of Autosys to the invention of Klein because Autosys is a job management system.
- 10. As to claim 9, Swartz teaches the process of claim 8 wherein the command line parameter is a Unix shell script (col. 4, line 52).

Application/Control Number: 09/329,456

Art Unit: 2127

17.

- 11. As to claim 10, Swartz teaches the process of claim 8 wherein the command line parameter is a Windows NT batch file (col. 4, line 50).
- 12. As to claims 11-12, it is rejected for the same reasons as stated in the rejections of claims 7-8.
- 13. As to claim 13, it is rejected for the same reasons as stated in the rejections of claim 9.
- 14. As to claim 14, it is rejected for the same reasons as stated in the rejections of claim 10.
- 15. As to claims 15-16, it is rejected for the same reasons as stated in the rejections of claims 7-8.
- 16. As to claim 17, it is rejected for the same reasons as stated in the rejections of claim 9.
- 18. As to claim 18, it is rejected for the same reasons as stated in the rejections of claim 10.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Tang whose telephone number is (703) 305-5334. The examiner can normally be reached on 8:30AM - 7:00PM, Monday through Thursday.

Application/Control Number: 09/329,456

Art Unit: 2127

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (703) 305-9678. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
